Dear Zoe

I wanted to express my thanks for your help and advice, I also wanted to let you know how pleased we are with the PowerDVD product.

We have recently upgraded our teaching PCs and found that our existing DVD player was no longer up to the job.

We are delighted with PowerDVD -it has enabled our teachers to play many formats of DVD with confidence.

This reliability has eliminated interruptions to lessons due to DVDs not always playing using our previous software.

From an IT support perspective PowerDVD has made my life much easier, especially the ease of install using the msi install facility.

I look forward to trying other CyberLink Products.

Very Best Regards Yours
